

Jason McClung

VICE PRESIDENT OF SCIF & SECURE SPACE CONSTRUCTION | SECURITY CONSULTING SERVICES

22 years of experience

DUTIES & RESPONSIBILITIES:

Design Review | ICD 705 Compliance Inspections | Full Scope Consulting

As Vice President of SCIF & Secure Space Construction | Security Consulting Services, Jason takes a proactive approach to building these technically challenging projects, for clients across the United States. His role is to preliminarily evaluate the project requirements, prior to the start of the construction, and identify any shortfalls within the design. Jason continually monitors the construction process in an effort to diagnose any potential problems or hurdles that could cause the accreditation, or use of the space, to be delayed.

In addition, Jason can develop strategies based on his 15 years of experience accrediting facilities across the Intelligence Community that will mitigate any technical field construction problems that may arise. By providing this evaluation & planning service, it is our goal to eliminate or reduce any problems or delays that can cost our clients extremely critical time and cause additional costs.

Jason's keen ability to interpret the government standards and incorporate the necessary requirements, leads to accreditation with zero delays. The relationships he has developed with accrediting government officials is an extremely valuable asset to every secure space project he is involved with.

EDUCATION / CERTIFICATIONS
